SOLAR LIGHTING - GOSPEL BROADCASTING

**REACH BEYOND**

NEW ZEALAND

# LIGHT UP A VILLAGE

Since 2014, Reach Beyond NZ has partnered with other ministries to provide solar panels, LED lights, and shortwave radios to people living in remote and rural villages throughout the Asia Pacific region, with a focus on India. In Ghana, West Africa, we are presently partnering to provide village lighting and Gospel content delivery through our new and improved Sheep Stations to over 100 villages.

## PROCLAIM THE GOSPEL

### Light, Power, and Inspiration

The new Sheep Stations are mounted on solar light poles that provide lighting, phone charging, and loudspeakers. These stations can deliver digital comics, discipleship materials, animations, and audio Bible programs in the language of the village listeners.

### Revolutionizing Gospel Content Delivery

The Sheep Stations also can provide public listening opportunities through loudspeaker broadcasts as well as 24/7 radio streams to mobile devices connected to the WiFi hotspot. Content and broadcast schedules can be programmed remotely and updated directly into the Sheep Station devices through the Internet or by Wi-Fi.

## PARTNER WITH US

Introducing an opportunity to make a real difference in the lives of people living in remote and rural villages throughout the world. Reach Beyond NZ is seeking partners to submit projects similar to our Light up a Village project. By partnering with us, you can make a real impact on the lives of people living in remote and rural villages. We invite you to submit similar projects to our Light a Village project and help us bring light and hope to those who need it the most.
