

USER MANUAL

● PRODUCT DETAILS

Product name: Solar outdoor light

Made in China

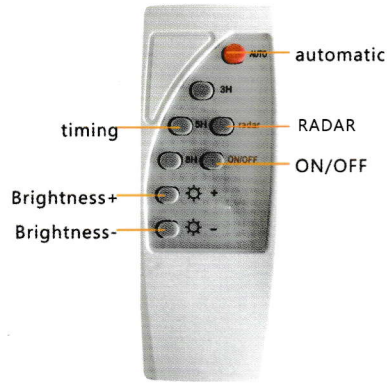

- 1 For first time use, please charge the product in a sunny place for 5-8 hours.
- 2 When the product is not used for a long time, please place the product in a sunny place to charge for a day in order to maintain the function of the battery. It is best to place the product in a sunny place once every month.
- 3 The charging time and charging efficiency of the solar panel may be affected by the weather and installation location. Considering the conversion rate of solar energy, if the product is used when the weather is good, it will improve the charging efficiency and effectiveness.

● CONTENTS OF THE PACKAGE

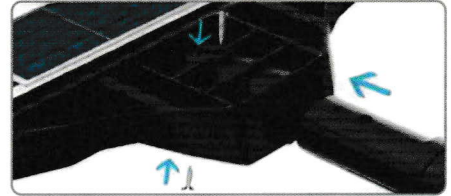

● REMOTE CONTROL BUTTONS

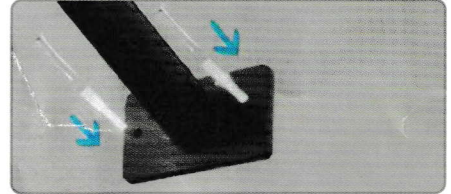

- ON** When you press the button ON, the solar street light will be 100% brightness.
- OFF** Turn off the light. (The light will not come on automatically the next night. If you need to turn on the light, you need to turn it on again with the remote control).
- 25%~100%** 25% ~ 100% adjustable brightness.
- 2H~8H** Timed to stay on for 2 / 3 / 5 / 8 hours. After 3h/5h/8h of continuous lighting, switch to motion sensor mode.
- Motion sensor mode** (when people are close 100% brightness; when people are far away 30% brightness. This mode cannot be permanently canceled permanently).

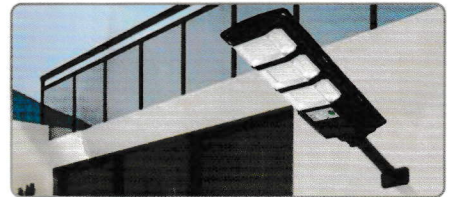

● INSTALLATION STEPS

- 1 Align the holes of the light body with the holes of the pole and use Phillips head screws to fix the pole and the light body.

- 2 Select the location of the building and fix the solar light to the building with Phillips screws and inverted rubber tips.

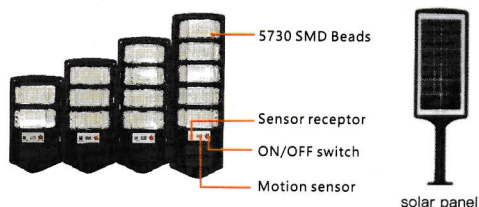

- 3 Installation complete
